

Equerry Horse Feeds

For more information please contact:

*Providing a solution to all your equines'
dietary needs*

Introduction

H J Lea Oakes have a milling heritage that stretches back to 1675, so naturally we know a thing or two about feeds.

Equerry products from our Congleton mill in Cheshire are another step in the continual development of the H J Lea Oakes range of feeds.

The horse feeds are made to a high standard at a specialist non GM mill, using only quality ingredients. The Equerry product range provides horses and ponies in all aspects of training and life with a feed suitable to meet their dietary requirements. If however you are unable to find the product you are looking for within this booklet then please don't hesitate to contact us on 01270 782222, as individual needs can be discussed and a solution found.

The Equerry range prides itself in being high quality but yet affordable feed, allowing everyone to meet the nutrition demands of their horses or ponies without breaking the bank.

All H J Lea Oakes feeds come with the assurance that they are made under the Universal Feed Assurance Scheme

Your Horse

Every horse is different and therefore every horse needs feeding according to its requirements.

Management - the way in which you keep your horse also affects the feeding requirements. Things to consider are: time stabled, time grazing, quality of feed and exercise regime.

Weight - A horse or pony will eat between 2-2.5% of its bodyweight per day. A simple calculation can be used in order to calculate how much feed is required for your horse:

$$\text{(Weight (kg) x 2.5)/100}$$

The calculated figure can be split between different feedstuffs (forage, concentrate etc) in order to meet your horse/ponies requirements.

Condition - The condition of your horse/pony will alter throughout their lifetime, and is affected by the type and breeds, therefore it is important to monitor the condition of your horse/pony and take in to consideration the type and breed. Condition Scoring is measuring the amount of fat cover on your horse/pony. Horses and Ponies will tend to store fat over their ribs, backbone and on their rump as well as their neck. In order to condition score your horse/pony correctly you should split your horse in to 4 sections and score out of 5 for each section, then take the average.

Workload - The amount of feed fed should enable your horse/pony to obtain a balanced amount of energy in order to meet their workload. If energy is in excess or deficient then the result will be weight gain or weight loss. The workload of a horse/pony can be split in to 4 categories, maintenance, light, medium and hard.

Feeding Guidelines - when feeding your horse any combination of feedstuff the following guidelines should always be followed:

- Ensure access to clean, fresh water
- Horses are “trickle feeders”, so feed little and often
- Feed forage of a high quality to maintain a healthy gut. Forage should make up about 1.5% of the horse/ponies bodyweight.
- Changes to the animal’s diet should be made gradually
- Feed should be stored separately to prevent cross contamination
- Feed buckets, scoops and utensils should be kept clean
- Horses’/Ponies’ teeth should be checked regularly to prevent discomfort when eating
- Horses/ponies should be wormed regularly

All Feed recommendations are there as a guideline and should be adapted according to the requirements or your horse/pony.

Follow our simple traffic light system to help find a diet to suit your needs:

-  High Energy (greater than 11.5 MJ/kg)
-  Medium Energy (10–11.5MJ/kg)
-  Low Energy (less than 10MJ/kg)

● Stud & Yearling Mix

Oil 5.25% Protein 15%
Fibre 11.0% Ash 8.0%

The ration is formulated to meet the nutritional demands of broodmares, working stallions and growing young stock. It is an ideal ration to feed in combination with a good quality forage. There is a high level of vitamins and minerals to help maintain a balanced diet.

The mix contains added biotin to improve hoof integrity and magnesium to aid with muscle and skeletal strength.

(Stocked item)

● Stud Cube

Oil 4.5% Protein 14.0%
Fibre 12.50% Ash 7.0%

The ration is formulated to meet the nutritional demands of broodmares, working stallions and growing young stock. It is an ideal cube to feed in conjunction with a good quality forage based diet. There is a high level of vitamins and minerals to help maintain a balanced diet. The feed contains added biotin to improve hoof integrity and magnesium to aid with muscle and skeletal strength. Added Vitamin E acts as a anti-oxidant, improving immune response, as well as improving muscle strength in growing horses.

(made to order in 2 tonne lots)

● High Fibre Nuts

Oil 2.5% Protein 6.0%
Fibre 24.0% Ash 5.0%

The nuts are formulated to contain a very high level of fibre to increase gut mobility and flow. The high fibre content increases gut fill and helps slow ingestion time. The high fibre nuts are a good substitute to forage based materials, and can be fed as a forage replacer, however the nut works better when fed in conjunction with good quality forage. This nut is not mineralised, for a mineralised version please see below.

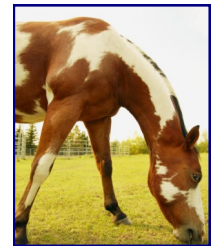

(Stocked item)

● Herbal Hi Fibre Horse & Pony Cubes

Oil 3.5% Protein 8.5%
Fibre 20.5% Ash 8.0%

The cubes are formulated to contain a high level of fibre to aid with digestion. The Herbal Hi Fibre horse & pony cubes contain added nutritional value to the High Fibre nuts due to the added vitamin and mineral pre-mix. The cube also contains added biotin and magnesium premix for improved nutritional value and to aid with hoof integrity. The added mint/herb spice aids with palatability, improving the intake for even the fussiest eaters.

(made to order in 2 tonne lots)

Racing

● Racehorse Cubes

Oil 4.25% Protein 15.0%
Fibre 10.5% Ash 8.0%

The Racehorse Cubes are formulated for racing thoroughbreds and horses in hard work. The ingredients are high quality and included in the cube is a vitamin and mineral premix to enhance the diet. The cube provides an optimum amount of energy and is combined with good quality proteins from soya to produce a good palatable cube for even the fussiest of eaters. The cube also contains added Biotin and magnesium to aid with a healthy diet and improve hoof integrity.

(made to order in 2 tonne lots)

● Racehorse Mix

Oil 6.5% Protein 14.0%
Fibre 9.0% Ash 7.5%

The Racehorse Mix is formulated for racing thoroughbreds and horses in hard work. The ingredients are high quality and contains a vitamin and mineral premix to enhance the diet. The mix provides an optimum amount of energy and is combined with good quality proteins from soya to produce a good palatable mix for even the fussiest of eaters. The mix also contains added Biotin and magnesium to aid with a healthy diet and improve hoof integrity.

(made to order in 1 tonne lots)

Horse & Pony

Horse and Pony Cubes

Oil 3.5% Protein 10.5% Fibre 16.5% Ash 8.0%

An ideal product for providing an optimal nutritional diet for equines in light-medium work on a predominantly grass based diet. The cube provides high quality protein and oil from soya which are specially included to aid with muscle development. The cube is supplemented to a high level with vitamins and minerals to aid a balanced diet. The 6mm extruded cube encourages roughage intake and a healthy gut fill. The mix also contains added Biotin to improve hoof integrity.

Horse and Pony Coarse Mix

Oil 3.5% Protein 10.0% Fibre 13.0% Ash 7.0%

An ideal coarse mix for providing an optimal nutritional diet for equines in light-medium work. The mix provides high quality protein and oil from soya, which is specially included to aid with muscle development. The mix is also supplemented to a high level of vitamins and minerals for a healthy coat and balanced diet. The mix also contains added Biotin to improve hoof integrity.

Premia Mix

Oil 5.25% Protein 15.0% Fibre 11.0% Ash 8.0%

A highly nutritional mix formulated for equines in medium-heavy work. The mix provides quality protein from soya, specially included to aid with muscle development and repair. The mix is supplemented with a vitamin and mineral premix to aid a balanced diet. The mix also contains added biotin to improve hoof integrity and magnesium to aid with muscle and skeletal strength.

Cool Mix

Oil 3.5% Protein 10.0% Fibre 16.5% Ash 7.5%

A perfect “non-heating” mix for those who wish to provide their horse with optimal nutrition without the emphasis on cereals. The mix has a very low cereal inclusion rate which means it does not provide “quick energy release”. This will help reduce any over excitability and unpredictable behaviour. The mix has a high quality protein source from Soya as well as added vitamins and minerals. The mix also contains added Biotin to improve hoof integrity.

(All above are stocked items)

Natures Choice

Natures Choice Mix

Oil 4.75% Protein 10.0%
Fibre 14.0% Ash 7.5%

Natures Choice is a specially formulated diet to meet the nutritional demands of horses/ponies in light to medium work. It is formulated to contain a high level of herb spice, in which mint and garlic are present. The added herbs not only help to improve palatability but also may have medicinal properties. Garlic can help to improve immunity by boosting "T" cells (infection fighting), as well as helping to open the bronchial passage, whilst also having properties that may have an anti-inflammatory effect. The garlic can also help to decrease insect and parasitic bites in summer months. Natures Choice uses only high quality, non GM products to make a fresh and clean coarse mix. The high quality ingredients provide an optimum nutrition for all horse and pony types, especially those which are fussy eaters.

(made to order in 1 tonne lots)

Veteran Mix

Oil 4.5% Protein 14.0%
Fibre 12.0% Ash 7.5%

An ideal mix for providing optimal nutrition for the older equine, achieved by providing high quality protein from Soya. The high quality protein is included to aid with muscle development and repair. The mix is also supplemented to a high level with vitamins and minerals to improve coat quality and help maintain a healthy diet.

(Stocked item)

Conditioning Mix

Oil 4.5% Protein 14.0%
Fibre 12.0% Ash 7.5%

A palatable molassed coarse blend formulated specifically to put on condition and enhance performance of horses, without too much emphasis on cereals. The mix is supplemented with vitamins and minerals improving performance that shows on both the inside and the outside. Added biotin also improves hoof integrity.

(made to order in 1 tonne lots)

Conditioning Cube

Oil 5.0% Protein 13.0%
Fibre 14.0% Ash 7.0%

The Conditioning Cube should be used to enhance performance of the under conditioned horse. Specially formulated with high quality protein from Soya, to aid with muscle development and repair, added vitamins and minerals to improve performance that shows on both the inside and the outside. The cube is manufactured as a 6mm cube.

(Stocked item)

Herbal Horse Treats

Oil 3.5% Protein 12.0%

Fibre 15.5% Ash 6.50%

Equerry Herbal Horse Treats are specially formulated to provide your horse or pony with a healthy treat. The treats contain a very palatable Herbal Mint Garlic mix, included to provide a healthy sweet taste to the treat. Equerry horse treats are an ideal way to spoil your horse or pony without the worry about sugar issues and thus dental problems. The treats are recommended as a treat and should therefore be fed accordingly. The treats are available in 2kg buckets providing a ideal solution to treating your horse whilst out and about at shows and events etc, the bucket also helps to improve storage and helps to maintain the treats to the highest quality from the day you bought them.
